Symbol Key

Over 150 exciting new products have been added to our line in 2015. This symbol identifies them for you. American Metalcraft now has more than 3,000 creative foodservice presentation items, making us one of the most innovative suppliers in the world.

This icon identifies products that have traditionally been among our top sellers. There are plenty of them throughout the catalog. If they work for other foodservice operators, chances are they'll work for you, too!

This logo is placed next to all products manufactured in the United States of America.

This logo indicates a product made in a North American Free Trade Association member country.

The RP symbol indicates all American Metalcraft products that are available in attractive retail packaging. A complete product listing is also available on pages 268-269.

Items that are shipped knocked down are easily identified by this symbol.

This icon helpfully indicates products that should be hand-washed only. For additional Care & Use instructions, please reference pages 266-267.

A) Chalk Markers

The secret to great signs is not so much the artists's talent but the tools employed. These markers write on all Securit® chalkboards, glass, mirrors, plastics, metal and all other non-porous surfaces. They are rain-resistant, smear-proof, and clean with just water and cloth. With this fabulous assortment of markers, anyone can create attractive marketing displays!

TABLETOP & BUFFET

C201S with H2 hot cell and HMSQ16 square tray

VIDACASA®
by American METALCRAFT

The first temperature-controlled buffetware that works independently of electricity, cords, gels, fire or ice.

iThermo technology

Unique thermal engines are at the heart of the Vidacasa system to ensure maximum transformation of electricity to heat. These powerful, lightweight hot cells can be easily interchanged for large events or small gatherings.

A) iThermo® Hot Cells

- Depending on the setting, Hot Cells with Lithium-ion batteries deliver constant temperatures of 176° F (80° C) or 230° F (110° C)
- Small cells maintain temp for up to 50 minutes
- Large cells maintain temp for up to 2 – 3 hours
- Recharge cells by connecting directly to a wall outlet

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
H2	Hot Cell 6" Sq. x 1" H (15.2 x 2.5 cm)	12	2.92	26	**360.00** Ea
H1	Pro Hot Cell 8" Sq. x 2" H (20.3 x 5.1 cm)	6	2.24	31	**880.00** Ea

Each cell can be recharged up to 500 times

Traditional Solutions	Vidacasa Solution
Sternos / Chafing Fuel	Vidacasa Hot Cell Servingware
Placed outside the plates, visible presentation	Placed inside the base tray, elegant presentation
Fire hazard	Flexible and safe to use
Inconsistent performance	Excellent warming performance up to 3 hours
Not reusable	Portable, Reusable, Safe and Eco-friendly

Temperature

Sterno causes hot spots

Vidacasa

Even heating

The heat energy is conducted through the flat surface of Vidacasa Hot Cells, ensuring food stays warm efficiently and evenly.

NSF
Tested and Certified by NSF

NEW

C361T with
(2) C2 cold cells and an FSLT18
faux slate melamine platter

Vidacasa is designed for chefs and caterers who need modern, safe & efficient ways to keep food hot or cold, indoors or outside.

iThermo technology

Vidacasa Cold Cells originated with technology that MIT developed for NASA, to help keep astronauts at a constant temperature during space walks.

C2 Ultra-Powered
Aluminum Cold Cell

C1 Ultra-Powered
Aluminum Cold Cell

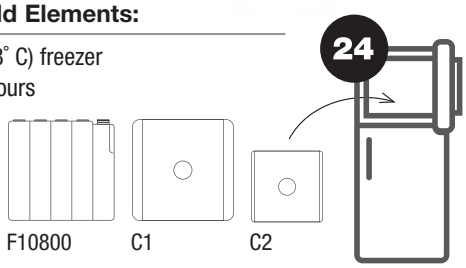

B) iThermo® Cold Cells

- Cold Cells deliver a constant temperature of 14° F (-10° C)
- Small cells maintain temperature for up to 1½ hours
- Large cells maintain temperature for up to 6 hours
- Recharge cells for 24 hours in a 0° F (-18° C) freezer

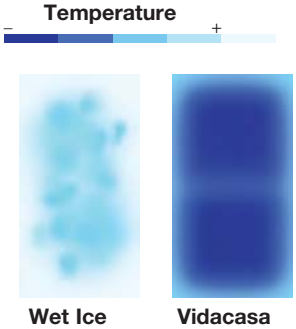

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
F10800	Cold Cell 7" L x 8" W x 1" H (17.8 x 20.3 x 2.5 cm)	6	0.42	15	**29.00** Ea
C2	Ultra-Powered Aluminum Cold Cell 6" Sq. x 1" H (15.2 x 2.5 cm)	12	0.30	11	**46.00** Ea
C1	Ultra-Powered Aluminum Cold Cell 8" Sq. x 2" H (20.3 x 5.1 cm)	6	0.50	20	**76.00** Ea

Recharge the Cold Elements:

- Recharge in 0˚ F (-18˚ C) freezer
- Recharge time: 24 hours
- Each cell can be recharged up to 1,000 times

Traditional Solutions	Vidacasa Solution
Wet ice / Dry ice / Blue gel with normal plate	VIDACASA servingware system with VIDACASA Cold Cell
Unsophisticated presentation	Elegant presentation
Poor performance	Outstanding Cooling Performance
Not reusable	Reusable, Eco-friendly
Dry ice is dangerous and toxic	Food safe and non-toxic

Even cooling

The cooling effect is conducted through the flat surfaces of VIDACASA Cold Cells, efficiently chilling food.

NOTE : The performance of the VIDACASA Cold Cell will not directly correlate to the temperatures of food on the plate surface, due to the density of food types, indoor / outdoor elements, and other external variables. On average, while using wet ice, food will only stay at a constant temperature of 41°F (5°C) or below for 8 minutes. With the VIDACASA F10800, food will stay at a constant temperature of 41°F (5°C) or below for 49 minutes, and with the VIDACASA C1, food will stay at a constant temp of 41°F (5°C) or below for 132 minutes. Full test results are available upon request.

NSF Tested and Certified by NSF

S1 Series Buffetware

Completely modular, Vidacasa includes plates that can mix and match with one another quickly to change buffet set-ups. You can easily change from cold cheeses and sushi to hot appetizers and entrees. With different iThermo cells, you can serve hot and cold food in the same buffet line.

S6 Series Tableware for Smaller Settings

Designed for table settings and more intimate gatherings, the S6 Series features a variety of smaller serving vessels, replacement parts, and accessories to fit. Each piece in this line also accepts both hot and cold cells. Note: Insulated bases and other items indicated are hand wash only.

Pizza Peel Wood Oil

Wood pizza peels should never be used under heat lamps or soaked in water. If necessary they can be seasoned or sealed with oil. To seal, wipe any food safe oil (like mineral oil) on the surface of the peel. Some oils will eventually go rancid; these oils should be avoided. If sealed, the peel is less likely to pick up unwanted odors, food particles and moisture. This will not increase the life span of the peel. Peels eventually wear out. If peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving on hot surfaces, which could increase chance of warping. Pizza peels are not dishwasher safe.

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
WDOIL	8 oz. (236.6 mL)	12	0.27	9	**12.40** Ea

A) Double Wall Stackable Bowls

Keep cold food cold with these stainless steel double wall bowls that feature pretty polished rims.

PLATE COVERS

A

HOT SELLER

Sample plate required with every new order.

Custom Plate Covers

The Perfect Fit, Time After Time

American Metalcraft is the only manufacturer to offer custom round, oval and square covers to fit plates, platters, and bowls. Foodservice operators are required to send a china sample to American Metalcraft. Plate covers are then custom-fit over the rim of the plate.

Manufactured from durable stainless steel, American Metalcraft plate covers are heat-retaining, odor-resistant, and they won't chip, crack, flake, burn or melt. Finger holes are available in most styles. The standard finish is polished on the sides and satin on the top. All satin or all mirror finish are also available. Always thoroughly dry plate covers after washing. Never store damp.

1. Plate covers are custom fitted over the rim of the plate with allowance for some normal size variation in commercial china. Covers are approximately 2" (5.1 cm) high over the rim of the plate. Extra high and lower height covers are also available (see p. 175).
2. Sample plates are required with all new orders for custom sizing. In most cases we guarantee our covers will stack with your customer's china.
3. To ensure secure stacking, a "crown" is formed in the top of the cover that matches the foot of the plate. This stacking feature offers safe multiple meal carrying and cuts down on serving time.

Ordering Tips

1. Since commercial china will vary in size, it is best to have the china company provide a sample for plate cover sizing. This assures us of furnishing a cover that fits over the rim of the plate properly and also enables us to custom design a "crown" on the top of the cover for solid stacking.
2. Send the sample plate(s) to American Metalcraft with your purchase order for pricing confirmation. Only prices quoted after receipt of sample plate(s) are guaranteed.
3. Some plates and oval platters with wide bases and oblong platters may not fall into the category indicated by their top outside dimensions.
4. Custom fit covers are manufactured approximately ⅛" larger than the sample plate provided. This will allow for some normal variation in the size of the china.
5. Most plate cover reorders should reference a previous order or an American Metalcraft invoice number.
6. Custom made covers are non-returnable.

Note: If you have china from more than one manufacturer, or from different lots, make sure you measure 5 from each and submit the largest and smallest of each.

A) Custom Fitted Stainless Steel Round Plate Covers

For Plates With Diameters Between*		Pricing Category	Weight	List Price
4½" to 6¾"**	(11.4 to 17.1 cm)	**CVR01**	3½ Lbs/Dz	**21.80** Ea

D) Corkscrews

Our wing corkscrew offers a deluxe finished, heavy duty "professional" corkscrew, with plastic bottle rest. Just turn screw into cork as usual, wing levers will rise, then simply depress levers & the cork will lift out easily.

Choose from 4 styles of our waiters' corkscrews. A premium brushed stainless steel corkscrew with a curved body, a black plastic handled corkscrew, a style with a curved knife or one with a straight knife.

The pocket corkscrew is portable and affordable. This 2-piece plastic corkscrew with stainless steel auger tucks safely away when not in use.

PIZZA SUPPLIES

A

A Guide to Our Pizza Trays

A) Aluminum Pans

Aluminum Pan

Aluminum pans are available in two weights. Standard Weight pans are 18 ga., .040", 1 mm aluminum and Heavy Weight pans are 14 ga., .064", 1.5 mm aluminum; Heavy Weight pans are 50% heavier than Standard Weight. Standard Weight pans are usually designated with an “A” as either the prefix or suffix in the item number and Heavy Weight pans are usually designated with an “HA” as either the prefix or suffix in the item number. Hand wash is recommended as aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Hand wash with detergents made specifically for aluminum. Through repeated use aluminum will soften, and if scoured, will thin.

B

B) Tin Plate Pans

Unseasoned Tin Plate Pan

Tin Plate should be seasoned before use and may need periodic reseasoning. Tin Plate will darken with use and will rust if refrigerated, soaked in water or left unseasoned in damp environments. Wipe dry immediately after hand washing. Tin Plate pans are designated with a “T” as either the prefix or suffix in the item number.

To Season Tin Plate Pans

To season, wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

C) Hard Coat Pans

Seasoned Tin Plate Pan

Hard coat pans are made from Heavy Weight aluminum. Perf and SuperPerf hard coat disks are made from Standard Weight aluminum. Hard Coat pans are usually designated with an “HC” as either the prefix or suffix in the item number. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. This finish is hard, and will not flake off. However, the aluminum underneath is soft and through repeated use the pan will soften. If scoured, the pan will thin. Hardcoat pans are not non-stick and must be seasoned. Hand wash only.

To Season Hard Coat Pans

Wash and dry the pan thoroughly, wipe oil on the inside and outside surfaces of the pan, and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not over bake and do not wash off excess oil, just wipe. The oil residue, and any additional oil added before baking, allows the pan to develop non-stick properties. Remember when cleaning hard anodized aluminum, this is considered an amphoteric coating, and will be attacked by solutions of a high alkaline or acidic nature. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

C

Hard Coat Pan

Please note:

In our catalog are thousands of different pizza trays and tens of thousands of different combinations of styles, depths, materials & options. **These pans are made to order; they are not stocked.** It is possible that your special order pan has never been made previously or has only been made once or twice. Consequently, special order pans are **not returnable**. Please review and re-confirm the tray you are ordering. If you have any questions, please call and, if necessary, request a sample. Special order pans are **not returnable**.

D) Nibs

Any round or square pizza tray or pan we manufacture, 2" (5.1 cm) deep or less, up to 20" (50.8 cm), can be furnished with Nibs. To order, use the regular item number and add the prefix “N.” Also note in the body of the order that the pans should be made with Nibs. The Nibs are approximately ⅝" (15.9 mm) diameter and raise the pizza about ⅛" (3.2 mm) above the surface of the pan. Raising the pizza off the surface allows moisture to escape and a fresher, crispier pizza may result. Pans with Nibs cannot be Perf or SuperPerf. Refer to the tray or pan style for more information and for pricing information.

E) Perf

Any round or square pizza tray or pan less than 21" (53.3 cm) in diameter can be Perforated. To order, use the regular item number and add the suffix or prefix “P.” Also note in the body of the order that the pans should be Perforated. These pans cannot be made with Nibs. Perf pans allow the bottom of the pizza to cook faster and can provide a crispier crust. Perf pans can also be used to keep cooked pizzas fresher by allowing moisture to escape. Refer to the tray or pan style for more information and for pricing information. All holes are ⅜" (9.5 mm) diameter.

F) SuperPerf

Any round pan less than 21" (53.3 cm) in diameter can be SuperPerf. To order, use the regular item number and add the suffix SP. Also note in the body of the order that the trays or pans should be SuperPerf. These pans cannot be made with Nibs. For the same diameter, SuperPerf pans have twice as many holes as Perf. SuperPerf allows the bottom of the pizza to cook faster and can provide a crispier crust. SuperPerf can be used to keep cooked pizzas fresher by allowing moisture to escape. All holes ⅜" (9.5 mm) diameter. Refer to the tray or pan style for more information and for pricing information.

Perf & SuperPerf Hole Guide

For pans with a maximum bottom inside diameter:		Number of Holes Standard Perf	Number of Holes Super Perf
5"	(12.7 cm)	10	20
6"	(15.2 cm)	21	42
7"	(17.8 cm)	36	72

B) Mega Screens

The only pizza screens tough enough to exceed the high standards of NSF, Mega Screens are the smart choice. Holes and open rims make cleaning a breeze and improve food safety. Available in aluminum or hard coat anodized aluminum, Mega Screens can last 5 to 10 times longer than standard pizza screens. Hard coat Mega screens are the most durable, cost-effective screens for conveyor oven use. Holes are ⅛" (0.32 cm) diameter.

A) Perf Disks

Manufactured from 18 gauge 1 mm aluminum, Perforated Disks can produce a more evenly baked crust by allowing for more air circulation. The edges of the disks and the edges of the holes are unfinished and may be sharp. Holes ⅜" (9.5 mm) Diameter.

A

A) TP Series Wide Rim Pans

There's a reason why other pizza supply manufacturers imitate, but never duplicate American Metalcraft's product line. When it comes to durability and reliability in pans, American Metalcraft offers the best value. The TP Series of Pizza Pans is manufactured from heavy duty 14 and 18 gauge aluminum. These gauges of aluminum contribute significantly to a longer life. With so many styles and sizes from which to choose, American Metalcraft has built a solid reputation as a quality manufacturer for the pizza industry since 1947.

B) CTP Series Coupe Style Pans

Just like the TP Pizza Pans, these CTP Pans are manufactured from the finest grade of aluminum. It's really pretty simple. The harder materials used in our pans last longer than less expensive alternatives in the marketplace.

D) 7000 Series

7000 Series are stacking covers for DEP, 2000, & 9000 pans, covers for the top of a stack for 5000 & 5100 pans, or as covers only for 4000 & 8000 pans. Only tapered pans can be made to stack with 7000's.

If you know the AM item number of your pan, look for it on the list. If you don't know the number, measure the top inside diameter of your pan and find the 7000 series cover with the largest smaller ID.

G

Pizza Peel Wood Oil

Wood pizza peels should never be used under heat lamps or soaked in water. If necessary they can be seasoned or sealed with oil. To seal, wipe any food safe oil (like mineral oil) on the surface of the peel. Some oils will eventually go rancid; these oils should be avoided. If sealed, the peel is less likely to pick up unwanted odors, food particles and moisture. This will not increase the life span of the peel. Peels eventually wear out. If peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving on hot surfaces, which could increase chance of warping. Pizza peels are not dishwasher safe.

Care and Use

Endurance™ Melamine Bowls & Platters

This nearly indestructible line of melamine is long-lasting when cared for properly. It is not recommended for microwave use and should be washed only in the top rack of the dishwasher. Regarding serving suggestions, we do not recommend any citric, acidic or strong-colored food products that would have direct contact with melamine. These products can cause staining over time. PET liners that can protect melamine from staining are available.

Cast Iron

Before first use, fill pan with water, bring to a boil, and wipe dry. After washing, seasoning is required. To season, apply a thin coat of melted shortening with a soft cloth. Apply shortening inside and out of pan and lid. Place pan/lid upside down on top shelf of a preheated 350º oven for one hour.

To clean, hand wash with a mild detergent and warm water. Never use cold water as that can cause pans to crack or warp. Do not expose to dishwasher, abrasive sponges, bristles, caustic cleaners, or acidic detergents. Use a small amount of cooking oil inside pan prior to each use and re-season when necessary.

Wrought Iron Griddles

Prior to using your American Metalcraft Griddle for the first time, hand wash with a mild detergent and warm water. Then dry thoroughly with a soft cloth. Do not expose wrought iron griddles to a dishwasher, abrasive sponges, caustic cleaners, or acidic detergents.

Hammered Copper, Bamboo & Wrought Iron

As beautiful as these lines are, they require special attention when cleaning. Please hand wash only with a soft cloth. Do not scour with steel wool or abrasive cleaners. We recommend our Copper Polish for hammered copper sold on p. 267.

Wood Peels & Serving Boards

Wood pizza peels and serving boards should never be soaked in water, even for a few minutes. To clean, simply wipe down with a damp cloth and allow to air dry. They can be seasoned or sealed with oil. To seal, wipe any food safe oil such as mineral oil on the surface of the peel. We recommend our Wood Oil sold on p. 267. If sealed properly, the peel is less likely to pick up unwanted odors, food particles, and moisture. If a peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving peels on hot surfaces. This increases the chance of warping.

Vidacasa by American Metalcraft

Hot & Cold Cells

To clean, wipe with water and a soft cloth. Do not submerge in water or expose to dishwasher, abrasive sponges or detergents. To recharge, reference pages 24 -25.

Lids & Insulated Polyurethane Bases

To clean, wipe with water, mild detergent, and a soft cloth. Do not expose to dishwasher, abrasive sponges or acidic detergents.

Securit® Signs

To erase Securit Chalk Marker messages on Table Boards, Chalkboards, Wall Boards, Sandwich Boards, and Bottle Displays, wipe with a soapy cloth followed by a clean cloth.

Galvanized Pails & Tubs

To clean, hand wash in warm water with mild detergent and dry quickly. Do not expose to dishwasher, abrasive sponges, bristles, caustic cleaners, or acidic detergents. Do not refrigerate, soak in water or use with acidic foods.

Carbon & Steel Pans

Seasoning is recommended. To season, wipe interior of pan with flavorless cooking oil and heat empty pan. When surface becomes hot, remove from heat and allow pan to cool. Repeat this process twice. Color of pan will change to a darker finish. This indicates that pan has gained a natural, non-stick protection.

To clean, hand wash in hot water with mild detergent. Dry with paper towel or place in warm oven for a few minutes. Store in dry place. Do not expose to dishwasher, abrasive sponges or acidic detergents. Not suitable for microwave.

Caution: Flat iron handle is not heat-resistant

Pizza Trays & Pans

To ensure a longer life, always use special care with American Metalcraft Pizza Trays and Pans.

Aluminum Pans & Trays – Aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Use detergents made specifically for aluminum. Through repeated use, aluminum will soften and, if scoured, will thin.

Tin Plate Pans – Tin plate should be seasoned before use and may need periodic re-seasoning. Tin plate will darken with use. Tin plate will also rust if refrigerated, soaked in water or left unseasoned in damp environments. Never soak in water. Wipe dry immediately after hand washing.

To Season Tin Plate Pans – Wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

Hard Coat Pans – These pans are made from heavy weight aluminum. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. The finish is hard and will not flake off. However, the aluminum underneath is soft and, through repeated use, the pan will soften. If scoured, the pan will thin. Hard coat pans are not non-stick and must be seasoned. Hand wash only.

To Season Hard Coat Pans **–** Wash and dry pans thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow it to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not over-bake and do not wash off excess oil. Just wipe. The oil residue and any additional oil added before baking makes the pan stick-resistant. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

Cleaning Products

To make your product care and maintenance as easy as possible, American Metalcraft offers this quality line of cleaners, polishes, oil, and scratch removers. Use these on a regular basis to improve the look and extend the life of your American Metalcraft products.

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
