# RieNu® Table Linen

## 100% Recycled Polyester

Riegel is turning plastic bottles into beautifully durable table linen. RieNu® by Riegel is a 100% recycled polyester linen produced from 100% post-consumer recycled PET EcoSure® fibers as certified by Scientific Certification Systems. Simply put, one 20x20 napkin made from RieNu® recycled polyester fabric eliminates three 16 oz. plastic bottles from our earth's landfills.

RieNu® by Riegel promises to look and feel as beautiful and touchable as Premier®, a 100% spun polyester product, while performing equally as well as maintaining Premier's high quality standards. Each product made of RieNu® 100% recycled polyester embraces the unique attributes inherent to the recycling process and as always is backed by Riegel's guarantee of customer satisfaction.

The process is simple. Bales of plastic bottles are collected, sorted, and inspected to eliminate foreign materials. These PET bottles are sterilized, dried, and crushed into small chips, melted down, and extruded into a new fiber. The finished fiber is then dyed and woven, then sewn into napkins and tablecloths in a variety of earth-tone and spa-inspired colors. A natural and slight variance in the fabric gives RieNu® recycled polyester table linen a hint of rare exclusivity.

- 100% recycled polyester made from Eco-Sure® fibers
- Available in 7 awe inspiring earthtone colors
- No picking, snagging, or linting
- Does not fade or bleed

What is triple sheeting and why is it important? Simply put, triple sheeting is an efficient, cost effective alternative to traditional comforters or duvets. It provides a luxurious, clean, crisp bed easily maintained by housekeeping which translates into savings in time and money. How?

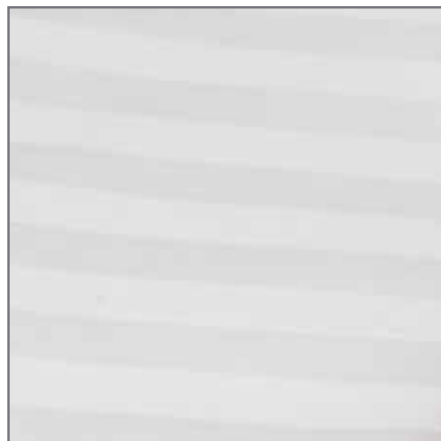

- all triple sheeting components can be laundered after every guest which generates a more sanitary environment
- replacing a bedspread with a single additional sheet reduces overall purchasing and laundering costs
- triple sheeting is an easy process that increases housekeeping efficiency

### Triple sheeting 101 -

1. cover the mattress with a fitted sheet or flat sheet tucked on all sides
2. add the second layer by placing the top hem of a flat sheet so it is even with the top of the mattress
3. layer a lightweight blanket approximately 6" below the top of the mattress
4. place a decorative top sheet over the blanket - the top hem even with the top of the mattress
5. fold both flat sheets down about 6" followed by an additional 6" fold to include the blanket
